<b>ORGANIZING COMMITTEE</b>	<b>Eco-Club</b>
<b>PROGRAMME COORDINATOR</b>	<b>Asst. Prof. Darshana Dhamdar</b>
<b>COMMITTEE MEMBERS</b>	<b>Asst. Prof. Sagar Yadav Asst. Prof. Dr. Motiraj Chavhan Mr. Gulab Gedekar</b>
<b>TARGET GROUP</b>	<b>All students of B.Sc.</b>

<b>NUMBER OF STUDENTS PARTICIPATED/BENEFICIARIES</b>	<b>16</b>
<b>BRIEF REPORT</b>	<p>The Eco-Club Committee of Bhiwapur Mahavidyalaya, under the auspices of its IQAC Chapter, organized an Essay Writing Competition on 2<sup>nd</sup> December, 2022 on the occasion of National Pollution Control Day. The students were tasked with writing Essays on the topic of “Pollution”. The Committee received a commendable response, with 16 participants actively taking part in this Competition. The Essays submitted by the students demonstrated their excellent writing skills and thoughtful insights. The Judging of the Essays was conducted by Asst. Prof. Dr. Yogesh More, Head, Department of Physics. The evaluation was based on the students’ vocabulary, presentation and creativity. The participants dedicated their best efforts to craft their Essays within the given time limit.</p> <p>Choosing the winners proved to be a challenging task for our Judge due to the high quality of presentations. However, a few participants were recognized for their exceptional efforts and hard work, earning them the top positions. The Committee congratulated Mr. Ganesh Bokade, Mr. Aishwarya Senapati and Ms. Khushboo Katekhaye for securing ‘A’ Grade.</p> <p>The winners were acknowledged and awarded prizes during the Annual Day Celebrations of our College.</p>

The list of students who actively participated in the Essay Writing Competition:

Sr. No.	Name of Students	Topic
1	Aishwarya Senapati	Litter Pollution
2	Khushboo Katekhaye	Oil Spoil
3	Ganesh Bokade	Air Pollution
4	Snehal Borkar	Air Pollution
5	Yugal Kapse	Pollution
6	Kalyani Tarare	Plastic Pollution

Oil Spill

1. Oil Spill

Oil spill is the release of a liquid petroleum hydrocarbon into the environment, especially marine areas, due to human activity, and is a form of pollution. The term is usually applied to marine oil spills, where oil spill is released into the ocean or coastal waters. but spills may also occur on land. Oil spills may be due to release of crude oil from tankers, offshore platforms, drilling rigs and wells, as well as spills of refined petroleum products (such as gasoline/diesel) and their by-products, heavier fuels used by large ships such as bunker fuel, or the spill of any oily refuse or waste oil.

2. Identification of the Problem

Oil spills create many problems throughout the world, including the United States. The impact on the ecosystem in an area can be severe many plants and animals suffer or are killed within a short time after the spill occurs. Many people spend their time and money cleaning up the oil. Scientists also

## Air Pollution Essay

### Essay on Air Pollution

01

Environmental changes are caused by the natural or artificial content of harmful pollutants and can cause instability, disturbance, or adverse effects on the ecosystem. Earth and its environment pose a more serious threat due to the increasing pollution of air, water, and soil. Environmental damage is caused by improper resource management or careless human activities. Therefore, any activity that violates the original nature of the environment and leads to degradation is called pollution. We need to understand the origin of these pollutants and find ways to control pollution. This can also be done by raising awareness of the effects of pollutants.

Air pollution is any physical, chemical or biological change in the air. A certain percentage of the gas is present in the atmosphere. Increasing or decreasing the composition of these gases is detrimental to survival. This imbalance in gas composition causes an increase in globe temperature which is called global warming.

#### Introduction to air pollution.

The Earth and its environment are facing a serious threat by the increasing pollution of the air, water and soil - the vital life support system of the Earth.

The damage to the environment is caused by improper management of resources or by careless human activity. Hence any activity that violates the original

### Litter pollution

Litter in our surroundings is an important environment issue, which many people overlook. While a majority of people do know that littering is a bad thing, many continue to carelessly scatter their trash around nonetheless. There are a host of problems that stem from littering, and the environment has been suffering as a result of some people's inability to control this habit. Money is also wasted because of it. The government has to employ people to pick up trash, and that means funding from tax revenue.

Littering can be hazardous to one's health as well.

Trash in an area attracts vermin and bacteria. Broken glass and other sharp objects are dangerous when left in public places. Litter is harmful to wildlife as well. Plastic can cause animals such as birds to choke, when they mistake it for food. And, even worse, small bits of plastic can accumulate in the stomach of a bird, never digesting or decomposing, to the point where there is no more room for real food and the bird starves to death with a full stomach.

Lastly, but most obviously, litter makes an area look bad.
