DETAILED REPORT OF THE ACTIVITY	Electronic Waste is the discarded electronics and electrical devices. It is one of the hazardous wastes. It has many hazardous effects on the environment and the health of the individuals. Improper E-waste processing in the Developing Nations can lead to adverse human health effects and pollution in the environment. As the decomposition of electronic items takes a more prolonged and different methodology, it is advised to decompose it in scientific and eco-friendly manner. The recycling of E-waste serves a lot of useful purposes. For example, protecting human and environmental health by keeping those devices out of landfills. Recovering the parts within the devices that still have value and providing the manufacturers with recycled metal that can be used to make new products. In India, the Government, through the Ministry of Environment, Forest and Climate Change (MoEF), released updated E-Waste Management Rules. International treaties like Basel Convention are aimed at lessening and regulating the movement of hazardous waste among countries. Our College also took efforts to exterminate E-waste from the society and to recycle it in a scientific way. Bhiwapur Mahavidyalaya has taken an initiative in collaboration with M/s. Suritex Pvt. Ltd., Nagpur, a Government authorized E-waste Recycler for recycling E-waste in a Scientific and Eco-friendly manner. On 2nd May, 2022 our College signed a Memorandum of Understanding (MoU) with M/s. Suritex Pvt. Ltd. For ensuring the proper disposal and the recycling of E-waste as per the safety norms set by the Maharashtra Pollution Control Board. Our College paid Rs. 15000/- exclusive of GST for E- waste services. To implement the same, our Institution established E-waste Collection Centre under the Department of Physics. A Policy was designed to ensure the proper working of the Centre. As per the Policy, Request letters were issued to various Institutions, Government Offices and to individuals for providing the E-waste. Circulars were also displayed on the Notice Boards, appealing the Students and the Staff members for providing E-waste. The E- waste collection Centre collected all sorts of E-Waste materials like Electrical and Electronic Appliances, IT Hardware and its consumables, Telecom Equipment and switches, Bio Medical Equipment and its spares, other Medical Devices, Power Chords, Cables, Wires, Chargers, Paper, Glass, Metal Scraps or any other device that is run on electricity/battery and provided it to M/s. Suritex Pvt. Ltd. We paid the Rs. 50/- for a piece of discarded monitor and CRT Display and

	Rs 10/- per kilogram for other items, against the total quantity of E-waste collected from the providers. This year our College has launched the 'Green Journey' initiative with the slogan 'From Campus to Community'. Under this initiative, the College's E-waste Collection Centre is actively collecting and recycling electronic waste, with the vision of making Bhiwapur Taluka free of E-waste by the year 2030." In this regard request letters have been dispatched to the Block Development Officer, Bhiwapur and to the Block Education Officer, Bhiwapur to facilitate E-waste collection from Gram Panchayat, Schools, Colleges and other educational Institutions under their jurisdiction. Replying to this letter, administrators issued a separate order to all Gram Panchayats, Schools, Colleges and other educational Institutions in Bhiwapur Tahsil for their cooperation in this initiative. The E-waste Collection Centre under the aegis of the office of the Principal also issued Appreciation Letters to the providers for supporting the College in this Noble Cause. A College level Committee was formed for monitoring and facilitating the E-Waste Collection. A special E-Waste Collection Drive was organized in our Campus on 27th February, 2026. 4 Monitors, 36 TV sets and 106 kg of E-Waste had been collected from 20 Donors during the Drive. Mr. Manoj Jaiswal, our Alumni and owner of P. M. Electronics, Bhiwapur provided 36 TV sets during the drive. During the Academic Session 2025-2026, a total of 1251 kilograms of E-waste was collected from various Institutions, Staff members and Students of our College and subsequently provided it to M/s. Suritex Pvt. Ltd for recycling. As per the E-waste Management Rule-2016 (Rule 19), M/s. Suritex Pvt. Ltd provided E-waste Manifest (C-Form 6). The College generated a revenue of Rs. 12150/- (Vide Cheque No. 001368 dated 20/08/2026) during the Academic Session 2025-2026.
PROGRAMME OBJECTIVES	• To raise awareness among students, Staff and the local community about the hazards of E-Waste and the benefits of responsible recycling. • To implement a systematic approach to collect, transport and recycle E-Waste in accordance with National and International regulations to ensure the safety of both environment and human health. • To foster partnerships with authorized E-Waste recycling entities, Government Agencies and local communities to collectively address the E-Waste problem. • To extract valuable materials from E-Waste items, such as metals and components, for reuse and contribute to the circular economy. • To prevent the harmful effects of improper E-Waste disposal on

	soil, water and air by diverting E-Waste from landfills and incineration. • To train Students and Staff in proper E-Waste handling, collection and awareness creation, promoting a culture of responsible E-waste disposal. • To mark the contribution of Department of Physics in executing Institutional Social Responsibilities.
PROBLEMS FACED, IF ANY	Awareness and Participation: Everyone is not aware of the harmful effects of E-waste or the importance of its proper disposal. Encouraging participation from Students, Staff and other individuals was challenging due to the lack of awareness. Collection Efficiency: Collection of E-waste required a structured collection system. The Committee faced some challenges like insufficient collection points, difficulties in reaching out to all potential contributors and ensuring consistent and regular collection. Inaccurate Sorting: E-waste often contains a wide variety of materials. Accurate sorting is essential to recover valuable components. Incorrect sorting can lead to loss of valuable resources and inefficient recycling. Health and Safety: Handling E-waste can expose individuals to hazardous substances. There was a need for proper safety measures, training and protective equipment for those involved in collecting and transporting the E-waste. To address these challenges, the Committee had a well-planned and comprehensive strategy for E-waste Management. This included raising awareness, implementing proper collection mechanisms, collaborating with authorized recycling partners, ensuring compliance with regulations and continuously evaluating and improving the mechanism based on the experiences and challenges already faced.
IMPACT/OUTCOME ACHIEVED	• Raised awareness among students, Staff and the local community about the hazards of E-Waste and the benefits of responsible recycling. • Implemented a systematic approach to collect, transport and recycle E-Waste in accordance with National and International regulations to ensure the safety of both environment and human health. • Fostered partnerships with authorized E-Waste recycling entities, Government Agencies and local communities to collectively address the E-Waste problem. • Extracted valuable materials from E-Waste items, such as metals and components, for reuse and contribute to the circular economy. • Tried to prevent the harmful effects of improper E-Waste

	disposal on soil, water and air by diverting E-Waste from landfills and incineration. • Trained our students and staff in proper E-Waste handling, collection and awareness creation, promoting a culture of responsible disposal. • Marked the contribution of Department of Physics in executing Institutional Social Responsibilities.
